## " We Love What We Learn "

### PTAA FORMULA FOR SUCCESS

- Learn what you love philosophy
- Computer Programming and Engineering (STEM focus).
- Grade placement based on aptitude.
- Challenging Curriculum for Gifted & Talented Students
- Small Class Sizes with low Student/Teacher Ratio
- Nutrition Programs
- 1:1 iPads and Technology available for all students
- Striving for healthy and sugar free campuses
- Summer Camp
- After school enrichment programs
- Excellent Preschool Available

For the last 35 YEARS our founding school has been providing best K-5th Grade Education in Mesquite!!!

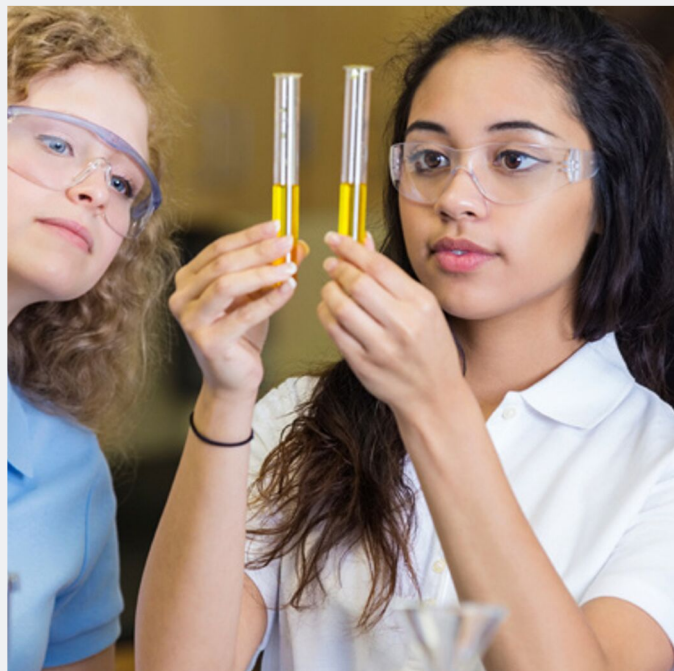

**PTAA K-5TH GRADE SCHOOL**

NOW ENROLLING FOR NEXT SCHOOL YEAR

## OUR MISSION

The mission of Pioneer Technology & Arts Academy is to empower and engage students to reach their full potential as global leaders who will enhance their communities and the world through creativity, collaboration and innovation

## PTAA VISION

Pioneer Technology & Arts Academy (PTAA) vision is to create academically superior graduates who are ready to meet the challenge of global competition.

PTAA believes that, as our students need to be competing and excelling at global level, it is important they are :

- prepared
- challenged
- mentored

## GIFTED AND TALENTED COURSES

Currently PTAA Gifted and Talented program start in Kindergarten. All classes from 3rd -5th grade are taught through rotation programs where students are able to undertake their core and electives subjects through aptitude rather than age.

Classroom placements are based on performance and not age.

## NUTRITIONAL PROGRAMS

PTAA believes the mental and physical health of a student is extremely important to create an ideal classroom atmosphere.

PTAA board members have been working on teaching the nutritional message in classrooms since 1986. PTAA strongly believes healthier kids are more focused and more attentive in the classroom, perform better on test & assessments, are absent less and exhibit more self-confidence.

## EXCEPTIONAL CURRICULUM

Our purpose at PTAA is to provide our students with a firm foundation in skills of reading, phonics, spelling, language, math, engineering, science, computer science and social studies. Spanish, music, physical education, computer programming and art balance out our program.

Our goals for each student include not only academic achievement, but also development of good work habits, and independent study skills.

We want each child to develop a positive self image and productive problem solving skills to become all that he or she can be.

## SCIENCE TECHNOLOGY ENGINEERING & MATH (STEM) AND ART BLEND

When you mix technology and art, you always come up with something innovative and creative. Fusion of Liberal Arts and Technology is extremely important to motivate creative students that think outside the box and are ready to face the global challenges as PIONEERS within the next decade.

## SCHOOL EDUCATION FOR ALL

At PTAA, we strive to provide a safe atmosphere where a child can be successful in a variety of areas.

Academically, emotionally, socially and physically we challenge our children to learn and grow in an environment of encouragement, confidence, security and love.
